# Login

## Secure Access

The login feature ensures only authorized users can access the system, protecting sensitive data and functionality.

## User Roles

Different user roles, such as admin and student, have tailored permissions to perform specific tasks within the application.

## Authentication

Users must provide valid credentials, such as a username and password, to authenticate and gain access to the system.

COURSES

## Add Course

### Upload Course Details

Easily add new courses to your learning platform by uploading course titles, descriptions, learning objectives, and other key details.

### Customize Curriculum

Tailor the course content to your students' needs by adding lessons, assignments, and assessments that align with your learning goals.

### Manage Course Materials

Upload a variety of course materials such as documents, presentations, videos, and interactive elements to provide a multimedia learning experience.

# Upload doc, pdf, ppt, video

## Document Uploads

Easily upload a variety of document types including PDFs, Word documents, and PowerPoint presentations. These files can be shared with students for reference and class materials.

## Video Uploads

Seamlessly integrate video content into your courses. Upload pre-recorded lectures, demonstrations, and supplementary video lessons for students to access anytime.

## Manage Media

Organize and manage your uploaded content in a centralized dashboard. Edit file details, control access, and monitor engagement with the various resources.

## Flexibility

The platform supports a wide range of file types, allowing you to incorporate diverse multimedia into your eLearning courses and provide a dynamic learning experience.

# Manage Course

## Update Course Details

Easily modify course titles, descriptions, durations, and other key information to keep your course catalog up-to-date.

## Manage Enrollment

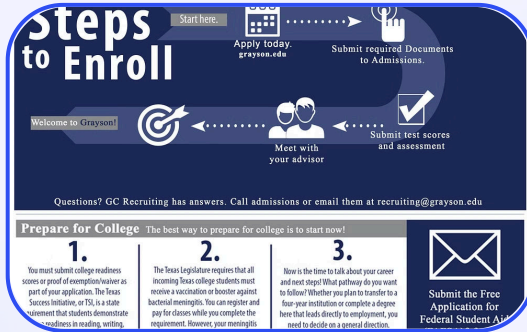

Add, remove, and update student enrollments to ensure the right learners are registered for each course.

## Monitor Progress

Track student performance, completion rates, and engagement to identify areas for improvement and ensure learning objectives are being met.

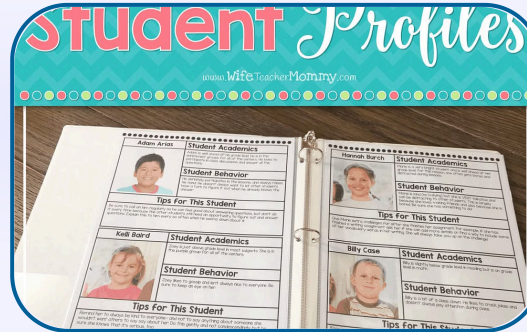

# Add Student Detail

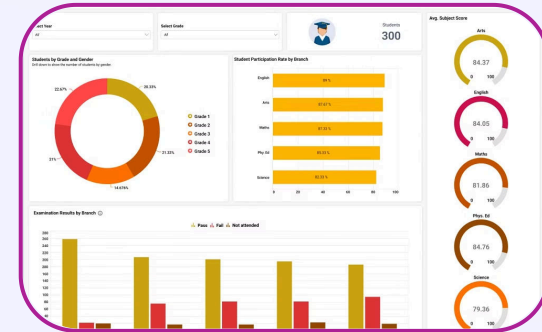

## Student Enrollment

Easily add new student details to the system, including their personal information, academic background, and contact details.

## Comprehensive Student Profiles

Create detailed student profiles that capture their achievements, progress, and any special needs or accommodations required.

## Centralized Student Data

Manage all student information in one convenient dashboard, allowing you to quickly access and update student records as needed.

# Manage Student Details

## 1 View Enrollment

Admins can view a list of all students enrolled in courses, including their names, contact information, and course registrations.

## 2 Update Student Profiles

Admins can edit student profiles, such as updating contact details, changing course enrollments, and modifying account settings.

## 3 Monitor Progress

Admins can track student progress, including assignment submissions, test scores, and course completion rates to identify areas for improvement.

## 4 Generate Reports

Admins can generate detailed reports on student performance, enrollment trends, and other key metrics to inform decision-making and optimize the learning experience.

# Add Exam Question

## Create Questions

Easily add new exam questions to the system. Customize question type, difficulty level, and subject area.

## Question Bank

Build up a robust question bank to draw from when assembling exams. Tag and categorize questions for efficient retrieval.

## Timed Exams

Configure timed exams with flexible durations. Ensure a fair and standardized testing experience for all students.

# User Module

The user module of the eLearning website enables learners to access and engage with the platform's educational content and features. Users can log in, view available courses, download materials, and participate in assessments.
